

Privacy Policy for Beaver Translate

Introduction

Beaver Translate is a Google Workspace Addon developed by Jack Carbone under the Riverside Local Schools organization. This privacy policy outlines how Beaver Translate operates with respect to user data and privacy.

Data Collection and Usage

Beaver Translate ****does not collect or use any user data****. It operates entirely within the Google Workspace environment, and no personal information or data is accessed or processed.

Third-Party Services

Beaver Translate ****connects exclusively with Google services and APIs**** to provide its translation functionality. All data interactions occur within the Google ecosystem and are subject to Google's privacy policies.

Data Storage

Beaver Translate ****does not store any user data**** outside of the user's Google Workspace environment. There is no data retention beyond the immediate session.

User Account Linking

Users are prompted to ****link their Google account**** with Beaver Translate before using the Addon. This linkage is necessary for the Addon to function seamlessly within the Google Workspace environment.

Contact Information

For any questions or concerns regarding Beaver Translate's privacy practices, you can reach Riverside Beaver Translate Support by emailing helpdesk@riversideschools.net.
